

ADVANTAGES

- Bag-In/Bag-Out safe-change for filters and dust discharge
- Integrated explosion protection (ATEX certified/NFPA compliant)
- Easy installation
- High-Vacuum applications
- 1 filter cartridge, air volume up to 1,200 m³/h (706 cfm)
- Online pulse cleaning without interrupting operations
- Long filter life

Application	Tabletting, filling, coating, granulating, drying, mixing, blending, packaging, central vacuum.
Min Temperature (°C)	-20
Installation Options	As space on the production floor is limited, the dust collectors of the Quad Pulse Package Series convince with their compact and space-saving design. Thanks to the integrated explosion protection no additional equipment is needed so that this plug-and-play units can be installed indoors without any limitations. Easy access for all maintenance functions.

Compact and strong unit construction incorporates a unique HEPA filter design, with specialized materials from the aerospace industry, providing the following key advantages:

- * The Quad Pulse Package HEPA filter captures the fine dust particles and is a tested flame and contamination barrier.
- * Additional, expensive explosion safety devices are not required.
- * The pressure resistant housing maintains its integrity with no damage during an explosion event.
- * Compact unit with flexibility for indoor installation reduces the need for long duct runs.
